

Release Date: June 6, 2008

Global Solutions 4, LLC. introduces a patent pending, space saving, "Go Green" carry-all bag.

(Corporate Wire) Coconut Creek, Florida, Global Solutions 4, a leader of innovative products has announced the introduction of a new "Go Green", patent pending product; The PAC (Portable Accessory Carry-all).

The PAC is an innovative, space saving carry-all that eliminates the need for consumers to use paper and plastic bags for shopping. This unique product weighs less than one pound yet has been tested by Consumer Testing Laboratories to hold over 30 lbs.

Finding ways to help save the environment is the responsibility of not only every individual but also of every business. Global Solutions 4 new product eliminates the need for consumers to use paper or plastic bags when shopping and thus doing its' part to help save the environment.

The problem with other "environmentally friendly" bags is that they are simply totes with no structure. Carrying heavy loads or carrying a large grocery order is simply impossible with the current products that are available. The PAC solves these issues. It can carry 6+ bags worth of groceries in one load! The PAC is a fully structured bag that folds to under one inch thick and weighs less than one pound. This light weight, space saving product allows consumers to carry heavy loads or many items with ease.

The versatility of the PAC is also why it has already been honored one of the Top 100 New Products at the International Housewares Show. The PAC is not only used for your groceries, but can be also as a laundry basket or hamper, a trunk organizer, a beach tote, a toy chest and much more. The durable mesh material used in the construction of the PAC is not only completely washable and light weight but also allows you to see the contents of what is in the carry-all. The PAC eliminates the need for consumers to have multiple totes, bags or baskets.

The PAC is an environmentally friendly, space saving, organizational product that has a lifetime warranty. The PAC will begin shipping in August and samples are available now! For more information about this innovative, award winning product please visit our website at www.GlobalSolutions4.com
